

JUST FACTS.

SEIZE THE DATA

People's Unfiltered Media Project

You are not in control of what you can see through social media and search engines. But there's a way to fix that.

Massive corporations that dominate the internet, like Google, Facebook, and Twitter, promote certain narratives while withholding key facts. As a result, We the People are left dangerously misinformed. We only see what they want us to see—distorted and biased snapshots of reality.

That is why Just Facts has launched the People's Unfiltered Media Project (PUMP): to harken back to a time when the whims of a few tech billionaires did not determine "truth." Our mission is to work around corporate censorship by physically putting facts in the hands of the American people.

To combat this misinformation, this latest edition of PUMP features facts about the January 6th riot on Capitol Hill and Democrats' subsequent push for the impeachment of President Trump.

The False Basis for Impeaching Trump Again

The impeachment resolution passed mainly by Democrats against President Trump claims that he is guilty of "inciting violence against the Government of the United States" because he stated earlier that day "if you don't fight like hell you're not going to have a country anymore."

Those words are taken out of context, as Trump used the word "fight" 20 times in the same speech but never called for or implied physical fighting. Instead, he was clear that he was speaking about legal means of fighting. For example, he said that Rudy Giuliani has "guts, he fights."

Furthermore, Trump emphasized that people should go "to the Capitol building to **peacefully** and patriotically make your voices heard."

Major media outlets and Democrats similarly twisted Trump's words when they impeached him in 2020 and in the aftermath of the violence in Charlottesville.
